MATÍAS **QUIROGA**

FULL STACK DEVELOPER

+61493991271 | quirogamatiasaustralia@gmail.com | The gap, Alice Springs 087'0

PROFILE

Proactive software developer with hands-on experience in both front-end and back-end development, skilled in API creation, database design, and implementation. Strong communicator with a collaborative mindset, adept at working in cross-functional teams. Seeking a technical support role where I can leverage my problem-solving expertise.

EXPERIENCE

BACKEND DEVELOPER | MODO AGRARIO

- Designed and implemented databases for customer and product data, ensuring efficient data management and system optimization.
- Built front-end components ensuring responsive and intuitive user interfaces for easier customer interactions.
- Developed and integrated APIs for a seamless flow of information between the front-end and back-end systems.
- Managed deployment of systems to custom domains, ensuring security and functionality of all web applications.

FULL STACK DEVELOPER | COBRANZAS ARGENTINAS

- System Automation via WhatsApp: Developed a messaging automation system that processes customer data from CSV files to send pre-defined messages and PDFs via WhatsApp, reducing manual effort and improving efficiency.
- Database Design & Implementation: Created and optimized customer information management systems using MongoDB, ensuring efficient data storage and retrieval.
- Deployment & Security: Deployed web systems to custom domains, maintaining high security standards and ensuring functionality in various environments.

FULL STACK DEVELOPMENT | ZANNI REAL STATE

- Front-End Development: Designed and developed intuitive, responsive user interfaces for property listings and client interactions using ReactJS, optimizing the customer experience with seamless navigation.
- Back-End Development: Built and managed server-side functionality using Node.js and Express, integrating real-time data updates and ensuring smooth operations for property management systems.
- API Integration: Developed and consumed RESTful APIs to facilitate dynamic data exchange between systems, enhancing real-time communicatíon for both clients and administrators.
- Collaborative Problem Solving: Worked with cross-functional teams, using Agile methodologies, to troubleshoot and resolve system issues, improving platform reliability and user satisfaction.
